ABOUT ME

Turning ideas into working software

I'm **Manal Rani**, a full-stack developer who started freelancing in 2021. I began by helping local businesses build their online presence, and that real client work taught me what actually matters: websites that work, look professional, and make a difference to the business behind them.

Today I focus on complete digital experiences — taking a project from an idea through design, development, and deployment — and making sure it genuinely helps the business it was built for. I hold a Bachelor's degree in Computer Science.

EXPERIENCE **Freelance since 2021**

EDUCATION **Bachelor's in Computer Science**

FOCUS **Full-Stack & Web Applications**

SERVICES

What I deliver

01

Full-Stack Web Development

Modern, database-driven web applications built end to end — frontend, backend, and everything in between.

02

Business Websites

Professional online presence that is responsive, credible, and built to turn visitors into customers.

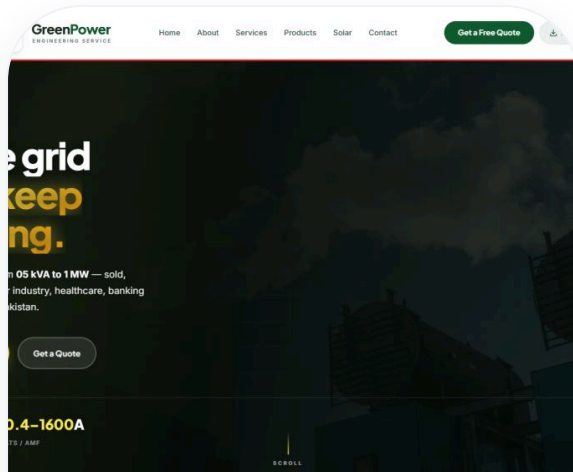

03

Web Applications

Dashboards, admin panels, and interactive tools with authentication, APIs, and real data.

FEATURED WORK

Real client projects — live on the web

BUSINESS WEBSITE · LIVE PROJECT

Green Power

Business website for a Karachi-based power engineering company selling, renting, and maintaining diesel and gas generating sets.

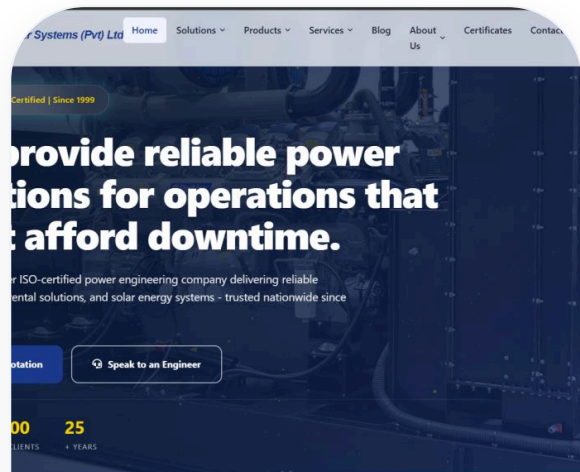

HTML5

CSS3

JavaScript

Responsive

greenpower.net.pk

CORPORATE WEBSITE · LIVE PROJECT

Smart Power Systems

Corporate website for a Pakistan-wide power company operating since 1999 — generators, solar, UPS/ATS, and company credentials.

HTML5

CSS3

JavaScript

Responsive

smartpower.com.pk

WHY WORK WITH ME

The experience you can trust

Real client experience

Websites already live for real businesses — not just mockups.

End-to-end delivery

Design, development, deployment, and support under one roof.
